

TSX Venture Symbol: SYH

Shares Outstanding: 133.1 million

Frankfurt Symbol: SC1P

Shares Fully Diluted: 167.5 million

US OTCQB Symbol: SYHBF

Primary Projects:

Moore | 100% Interest

In June 2016, Skyharbour acquired the 35,705 hectare Moore Uranium Project from Denison, a large strategic shareholder of the Company. It is located in the infrastructure-rich southeastern portion of the Athabasca Basin. High grade, unconformity hosted uranium mineralization was discovered at the Maverick Zone in the early 2000's and in 2017, Skyharbour carried out drill programs at the project and reported 20.8% U3O8 over 1.5 metres within 6.0% U3O8 over 5.9 metres in hole ML-199. Only half of 4.7km prospective Maverick corridor has been systematically drill tested leaving strong discovery potential along strike as well as at depth in the underlying basement rocks.

South Falcon Point | 100% Interest

Located on the east side of the Athabasca Basin consisting of 16 claims covering 25,847 hectares. The South Falcon Point property hosts a shallow, NI 43-101 inferred mineral resource totaling 7.0 million pounds at an average grade of 0.03% U3O8 and 5.3 million pounds at an average grade of 0.023% ThO2.

Russell Lake | Option to acquire an initial 51% and up to 100% from Rio Tinto

The Russell Lake Project is a large, advanced-stage uranium exploration property totalling 73,294 hectares strategically located between Cameco's Key Lake and McArthur River Projects and adjoining Denison's Wheeler River Project to the west and Skyharbour's Moore Uranium Project to the east. Highway 914 and powerlines which service the McArthur River mine, run through the western extent of the property and greatly enhances accessibility. The Project has had a significant amount of historical exploration carried out on it which has identified numerous prospective target areas and several high-grade uranium showings as well as drill hole

Overview:

Skyharbour is a preeminent uranium exploration and early-stage development company with projects in and around the prolific Athabasca Basin of Saskatchewan, Canada. The Company has been acquiring top-tier exploration projects at attractive valuations culminating in uranium properties totaling over 450,000 hectares throughout the Basin. Skyharbour's goal is to maximize shareholder value through new mineral discoveries, committed long-term partnerships, and the advancement of exploration projects in geopolitically favourable jurisdictions.

Top-tier Athabasca Basin uranium project portfolio with robust discovery and resource expansion potential; dual strategy of focused exploration at core projects coupled with prospect generation at secondary projects

Skyharbour has fifteen uranium projects, ten of which are drill-ready, totaling over 450,000 hectares strategically located throughout the Athabasca Basin. The projects offer strong discovery potential, and the Company is looking to emulate the recent successes of other Athabasca Basin discoveries. The Athabasca Basin provides exploration companies a unique opportunity as it is host to the highest grade uranium deposits in the world averaging 1-2% U3O8 with some deposits averaging over 15% U3O8. Skyharbour will be carrying out exploration programs over the coming months and years including upcoming drill programs at its flagship Moore Uranium project along with the recently optioned Russell Lake Uranium Project from Rio Tinto. In addition to its own drill programs, Skyharbour has been able to advance its properties through partnerships with other companies and will continue to employ this prospect generator strategy on its secondary properties. This allows for additional exploration funded by other companies, stock / cash payments made to Skyharbour, and ample news flow while typically retaining minority interests and upside exposure in these projects.

Secondary Projects:

Preston | 24.5% Interest with JV Partner Orano Owning 51%

Large land package in Patterson Lake area of west side of basin totalling 49,635 ha strategically located near Fission's Triple R deposit and NexGen's Arrow deposit. Orano Canada completed earn-in option for 51% interest and formed a joint venture with Skyharbour.

East Preston | 15% Interest with JV Partner Azincourt Owning 70%

Located on the west side of the Basin, the 20,647 ha Project hosts promising exploration targets. Azincourt Energy completed an earn-in for a 70% interest and formed a JV partnership with Skyharbour.

Hook Lake | Current 100% Interest with 80% Under Option

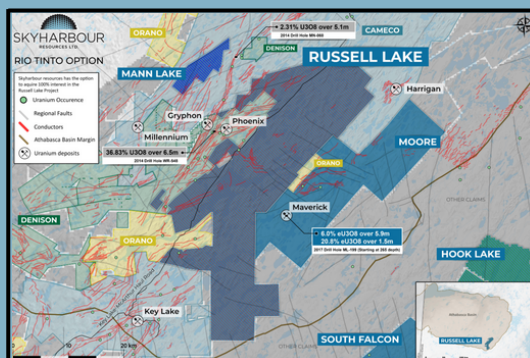

Project totals 25,847 ha on the east side of the basin. In December 2020, Valor Resources signed an agreement to acquire an 80% interest by spending CAD \$3.5 million in exploration and cash payments of \$475,000 over 3 years as well as issuing Skyharbour 233,333,333 shares of Valor.

Yurchison Lake | Current 100% Interest with initial 70% Under Option

Project consists of 12 claims totaling 55,934 ha in the Wollaston Domain. In November 2021, Medaro Mining Corp. signed agreement to acquire an initial 70% interest by spending CAD \$5 million in exploration, \$800,000 in cash payments and \$3 million in Medaro shares over 3 years.

Mann Lake | Current 100% Interest with 75% Under Option

Strategically located on east side of the Basin, 25 km SW of Cameco's McArthur River Mine and 15 km NE and along strike of Cameco's Millennium uranium deposit. In October 2021, Basin Uranium Corp. signed an earn-in option to acquire a 75% interest in the project.

Timing with an improving uranium market and increasing prices:

Global demand for electricity to grow by approx. 50% by 2040; electric vehicles adding to this

Nuclear provides base-load, emissions-free, reliable low-cost electricity while providing grid stability and local jobs

441 current operable reactors, 55 reactors under construction, over 400 reactors ordered/planned/proposed

2022 expected demand approx. 195 million lbs with 2022 expected primary mine supply of approx. 140 million lbs; looming supply shortfall

Strong management and technical team with track record of success:

JORDAN TRIMBLE, B.Sc., CFA - President, CEO and Director

Mr. Trimble is an entrepreneur and has worked in the resource industry with numerous companies specializing in management, corporate finance and strategy, shareholder communications, business development and capital raising. Previously, he was the Corporate Development Manager for Bayfield Ventures, a gold company with projects in Ontario which was acquired by New Gold in 2014.

JAMES PETTIT - Chairman and Director

James Pettit is the Chairman of the Board and a Director. Mr. Pettit brings over 30 years' experience within the resource industry specializing in finance, corporate governance, management, and compliance.

DAVID CATES, CPA, MAcc - Director

David Cates is the President and CEO of Denison Mines (TSX: DML, NYSE: DNN) and serves on the Board of Directors of the Canadian Nuclear Association. Prior to being appointed the President and CEO, Mr. Cates served as Denison's Vice President Finance, Tax and Chief Financial Officer. Prior to joining Denison, Mr. Cates held positions at Kinross Gold Corp. and PwC LLP with a focus on the resource industry.

DAVID BILLARD, P.Geo. – Senior Consulting Geologist

Mr. Billard is a geologist with over 35 years of uranium exploration and development experience in the Athabasca Basin. He was COO, VP Exploration and Director for JNR Resources prior to their acquisition by Denison Mines in 2013. Before JNR, he was employed by Cameco Corp. for 12 years

PAUL MATYSEK, M.Sc., P.Geo - Strategic Advisor

Mr. Matysek ran Energy Metals Corp increasing its market cap from \$10 million in 2004 to \$1.8 billion when it was acquired by uranium producer Uranium One in 2007. Mr. Matysek was the Chairman of Lithium X, which sold for \$265M in late 2017. He was the President and CEO of Goldrock Mines which in June 2016 was acquired for \$129 million by Fortuna Silver. Mr. Matysek also sold Potash One Inc. for \$434 million to K+S Ag and merged Lithium One with Galaxy Resources for \$112 million.

JOSEPH GALLUCCI, MBA, ICD.D - Director

Mr. Gallucci is currently a Managing Director and the Head of Mining Investment banking at Laurentian Bank Securities. He is a Capital markets executive and banker with >20 years' experience focused on mining previously working at BMO Capital Markets, GMP Securities, Dundee Securities. He previously led the Mining Investment Banking team at Eight Capital. He has been directly involved in raising several billion dollars for mining companies.

Noteworthy shareholder base and significant insider ownership:

Insiders/management and other key shareholders hold over 50% of the shares

- Denison Mines Corp. (TSX: DMC) (NYSE: DNN)
- Management and Insiders
- Sprott Uranium Miners ETF (URNM)
- Global X Uranium ETF (URA)
- Sachem Cove Partners
- OTP Fund Management Ltd.
- Jeff Phillips (Global Market Development)
- Marin Katusa and KCR Fund
- Extract Capital
- L2 Capital Partners

Milestones and Catalysts

2016 - 2022 Milestones:

- ✓ Completed transaction with Denison to acquire flagship Moore Uranium project and subsequently drilled over 34,000m drilled with highlights including 20.8% U3O8 over 1.5m at 264m depth within 6.0% U3O8 over 5.9m, 9.12% U3O8 over 1.4m at 278m depth, 6.80% U3O8 over 2.0m, and 5.29% U3O8 over 2.5m at 279m depth
- ✓ New high grade uranium zones being discovered in underlying basement rocks and at regional targets at Moore Project
- ✓ Signed separate option agreements with Orano Canada (Preston), Azincourt Energy Corp. (East Preston), Valor Resources (Hook Lake), Basin Uranium Corp. (Mann Lake) and Medaro Mining Corp. (Yurchison) with both Orano and Azincourt completing their earn-ins and forming JV's
- ✓ Signed option agreements total CAD \$19.8 million in exploration expenditures, CAD \$10.2 million in cash payments and large share issuances from partner companies to SYH
- ✓ Partner companies have completed many exploration programs at these projects over the last several years funding the bulk of the field work and drilling

2022 Catalysts:

- ✓ Skyharbour secured an option to acquire an initial 51% and up to 100% of the Russell Lake Uranium Project from Rio Tinto; Rio to become strategic shareholder and potential project partner
- ✓ 2500m drill program recently completed with assays pending at the Moore Uranium Project focusing on the Maverick East Zone, Viper target area, and the Grid 19 target area
- ✓ Recently completed drilling and assays pending from partner companies: Azincourt Energy at East Preston Project (5,000m), Valor Resources at Hook Lake Uranium Project (2,000m), and Basin Uranium Corp. at the Mann Lake Uranium Project (3,500m)
- ✓ High grade uranium discovery and resource expansion potential at project base including additional exploration and drill programs planned in 2022 by SYH and partner companies
- ✓ Additional drilling programs at Moore and initial drill program at the adjacent Russell Lake Project
- ✓ Continue executing on the prospect generator strategy by optioning projects to partner companies who will fund exploration
- ✓ Uranium market recovery with improving sentiment for nuclear energy and compelling underlying fundamentals for uranium
